TO : ALL HOSTEL RESIDENTS
REF : INTERNET BLACKLIST

We are pleased to announce that IT Services will be quarantining and blacklisting PCs that are not patched and are broadcasting threats to other users on the network.

Please make sure your PC OS is properly patched and anti-virus definitions are up to date to avoid being banned / quarantined.

Quarantine PCs will NOT be able to access the Internet and will be moved to a safe/remedial zone. The affected owner will receive notifications and instructions via SMS. For this reason, please ensure that your hand phone and email id are updated at the Hostel Office.

Once you have cleaned your PC, please inform the Hostel Office or our partner CNX to remove your PC from the blacklist in order that you can access the Internet again. For further information, please call CNX at 016-6396313 or 03-78048303.
